Notes to Consolidated Interim Financial Statements

March 31, 2021

(Expressed in US Dollars)

(1) Reporting Entity

Corporación Interamericana para el Financiamiento de Infraestructura, S. A. (the Corporation or CIFI) was organized on August 10, 2001 under the laws of the Republic of Costa Rica and began operations in July 2002. As of April 4, 2011, the Corporation was legally redomiciled under the laws of Republic of Panama.

The Corporation's business structure is based on one segment, as its main line of business is granting loans to finance infrastructure projects in Latin America. However, it also offers other services such as "Advisory & Structuring" services, which are not evaluated as a separate segment of the Corporation's business but rather assessed in conjunction with its lending activities.

Effective July 1, 2016, CIFI moved its headquarters from Arlington, Virginia to Panama City, Republic of Panama; the presence in Panama has allowed the Corporation to be closer to CIFI's Latin America and Caribbean operations, which is its center stage. Panama is an important financial center in Latin America and the Caribbean, and also it is a logistical enclave that allows quick access to the region.

The Corporation's main offices are located at MMG Tower, 13th Floor, Office 13A, Paseo Roberto Motta Avenue, Costa del Este, Panama City, Republic of Panama.

The Corporation owns or controls the following subsidiary companies incorporated in 2017:

_	Country of Incorporation Controll			ng Ownership
_			March 31, 2021	<u>December 31,</u> <u>2020</u>
CIFI SEM, S. A.	Personnel Management	Panama	100%	100%
CIFI PANAMA, S. A.	Lending & Financing Structuring	Panama	100%	100%
CIFI LATAM, S. A.	Lending & Financing Structuring	Panama	100%	100%
CIFI AM, S.A.	Administration of Investment Funds	Cayman Islands	100%	100%

(2) Basis of Preparation

(a) Statement of compliance

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

(b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis, except for derivative financial instruments and certain investment securities that are measured at fair value, assets held-for-sale measured at fair value less costs to sell, investment property at fair value and bonds designated as hedged items in qualifying fair value hedging relationships which are measured at amortized cost adjusted for hedging gains or losses.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(2) Basis of Preparation, continued

(c) Functional and presentation currency

The consolidated financial statements are presented in U.S. dollars (US\$), which is the Corporation's functional currency.

All of the Corporation's assets and liabilities are denominated in U.S. dollars. Additionally, shareholder contributions and ordinary shares are denominated in that currency.

(d) Use of estimates and judgments

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is reviewed and in any future years affected.

Information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are included in the following notes:

- Allowance for loan losses and accrued interest receivable note 6;
- Fair value of financial instruments note 16.

(3) Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in these consolidated financial statements.

(a) Basis of Consolidation

(i) Subsidiaries

The Corporation has control on a subsidiary when it is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns. The financial statements of the subsidiaries, described in Note 1, are included in the consolidated financial statements since the date the Corporation obtains control and ceases when the Corporation loses control.

Income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective acquisition/inception date or until the effective disposal date, as applicable.

(ii) Transactions eliminated in consolidation

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the Corporation and its subsidiaries are eliminated in preparing the consolidated financial statements.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

(b) Foreign currency transactions

The Corporation's functional currency is the U.S. dollar, and all assets and liabilities are denominated in U.S. dollars (US\$). In case the Corporation has assets and liabilities denominated in currencies other than the U.S. dollar, the Corporation translates the value of such assets or liabilities into U.S. dollars at the prevailing exchange rate between the currency in which the assets or liabilities are denominated and the U.S. dollar as of the reporting date. Transactions in foreign currency are translated at the foreign exchange rate in effect at the date of the transaction. Translation gains or losses are presented in profit or loss.

(c) Cash and cash equivalents

Cash and cash equivalents include currency on hand, unrestricted cash balances held with banks, and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value and are used by the Corporation for management of its short-term commitments.

(d) Financial assets and financial liabilities

(i) Recognition and initial measurement

The Corporation initially recognizes loans receivable, debt securities issued and subordinated liabilities on the date on which they are originated. All other financial instruments are recognized on the trade date, which is the date on which the Corporation becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification

Financial assets

IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never bifurcated. Instead, the hybrid financial instrument as a whole is assessed for classification.

All other financial assets are classified as measured at FVTPL.

Business model assessment

The Corporation assesses the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those
 policies in practice. In particular, whether management's strategy focuses on
 earning contractual interest revenue, maintaining a particular interest rate profile,
 matching the duration of the financial assets to the duration of the liabilities that
 are funding those assets or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Corporation's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected: and
- the frequency, volume and timing of sales in prior years, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Corporation's stated objective for managing the financial assets is achieved and how cash flows are realized.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, principal is defined as the fair value of the financial asset on initial recognition. Interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Corporation considers the contractual terms of the instruments. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Corporation considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Corporation's claim to cash flows from specified assets e.g., non-recourse asset arrangements; and
- features that modify consideration of the time value of money e.g., periodical reset of interest rates.

The Corporation holds a portfolio of long-term fixed rate loans for which the Group has the option to propose to revise the interest rate at periodic reset dates. These reset rights are limited to the market rate at the time of revision. The borrowers have an option to either accept the revised rate or redeem the loan at par without penalty. The Corporation has determined that the contractual cash flows of these loans are solely payments of principal and interest because the option varies the interest rate in a way that reflect a consideration for the time value of money, credit risk, other basic lending risks and costs associated with the principal amount outstanding.

Financial Liabilities

Under IFRS 9 all fair value changes of liabilities designated as at FVTPL will generally be presented as follows:

- the amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and
- the remaining amount of change in the fair value is presented in profit or loss.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

The Corporation has not designated any liabilities as at FVTPL and does not intend to do so.

(iii) Derecognition

A financial asset is derecognized when the Corporation loses control over the contractual rights that comprise the asset. This occurs when the rights are realized, expire, or are surrendered. The Corporation derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

(iv) Modifications to financial assets

Financial assets

If the terms of a financial asset are modified, the Corporation evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized, and a new financial asset is recognized at fair value.

If the cash flows of the modified asset carried at amortized cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Corporation recalculates the gross carrying amount of the financial asset and recognizes the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss. If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income.

(v) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Corporation has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Corporation measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with enough frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Corporation uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Corporation measures assets and long positions at a bid price and liabilities and short positions at an ask price.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

The fair value of a demand deposit is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

The Corporation recognizes transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

(vi) Impairment

The Corporation recognizes loss allowances for ECL on the following financial instruments that are not measured at FVTPL:

- Financial assets that are debt instruments; and
- Loan commitments issued and financial guarantees.

No impairment loss is recognized on equity investments.

The Corporation measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- Debt investment securities that are determined to have low credit risk at the reporting date; and
- Other financial instruments on which credit risk has not increased significantly since their initial recognition.

The Corporation considers a debt security to have low credit risk when their credit risk rating is equivalent to the globally understood definition of 'investment grade'.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls.
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows.
- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Corporation if the commitment is drawn down and the cash flows that the Corporation expects to receive.
- Financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Corporation expects to recover.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognized and ECL are measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then
 the expected fair value of the new asset is treated as the final cash flow from the
 existing financial asset at the time of its derecognition. This amount is included in
 calculating the cash shortfalls from the existing financial asset that are discounted
 from the expected date of derecognition to the reporting date using the original
 effective interest rate of the existing financial asset.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt financial assets carried at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or past due event;
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganization; and
- The disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

Presentation of allowance for ECL in the consolidated statement of financial position

Loss allowances for ECL are presented in the consolidated statement of financial position as follows:

- Financial assets measured at amortized cost: as a deduction from the gross carrying amount of assets;
- Loan commitments and financial guarantee contracts: generally, as a provision;
- Where a financial instrument includes both a drawn and an undrawn component and the Group cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Group presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- Debt instruments measured at FVOCI: no loss allowance is recognized in the consolidated statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognized in retained earnings.

Write-offs

Loans and debt securities are written off when there is no realistic prospect of recovery. This is generally the case when the Corporation determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities, in order to comply with the Corporation procedures for recovery of amounts due. Any write-off must be recommended by the Risk Committee and approved by the Board of Directors.

Financial assets

IFRS 9 contains a forward-looking 'expected credit loss' (ECL) model. This will require considerable judgment over how changes in economic factors affect ECLs, which will be determined on a probability-weighted basis.

The impairment model is applied to financial assets measured at amortized cost and FVOCI, except for investments in equity instruments.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

A three-stage approach to impairment is used for financial assets that are performing at the date of origination or purchase. This approach is summarized as follows:

- 12-month ECL: The Corporation recognizes a credit loss allowance at an amount equal to 12-month expected credit losses. This represents the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, assuming that credit risk has not increased significantly after initial recognition.
- Lifetime ECL not credit-impaired: The Corporation recognizes a credit loss allowance at an amount equal to lifetime expected credit losses for those financial assets which are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on lifetime probability of default (LTPD) that represents the probability of default occurring over the remaining lifetime of the financial assets. Allowance for credit losses is higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered compared to 12-month ECL. The criteria for recognizing a "Significant Increase in Credit Risk", to migrate from 12-month ECL to Lifetime ECL not credit impaired, are:
 - a. A 95% rating migration from initial Credit Risk Rating. This migration matrix is based on CIFI's historical rating migration data. In addition, if a country is downgraded 3 or more notches, in a 6-month consecutive period, the Risk Committee will analyze all loans in order to decide which loans shall migrate to "Watch List";
 - b. Early Warning System (EWS) Red Zone. The EWS model is a scoring system internally developed and based on a client credit worthiness; and
 - c. By credit events that might affect country or industry risk, based on a documented opinion by the Risk Unit, and approved by the Credit Committee.
- Lifetime ECL credit-impaired: The Corporation recognizes a loss allowance at an amount equal to lifetime expected credit losses, reflecting a probability of default (PD) of 100% via the recoverable cash flows for the asset, for those financial assets that are credit-impaired.
- Financial assets that are credit-impaired upon recognition are categorized within this stage with a carrying value already reflecting the lifetime expected credit losses. The accounting treatment for these purchased or originated creditimpaired (POCI) assets is discussed further below.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

- POCI: Purchased or originated credit-impaired (POCI) assets are financial
 assets that are credit impaired on initial recognition. POCI assets are recorded
 at fair value at original recognition and interest income is subsequently
 recognized based on a credit-adjusted effective interest rate. ECLs are only
 recognized or released to the extent that there is a subsequent change in the
 expected credit losses.
- (e) Derivatives held for risk management purposes and hedge accounting Management uses derivative financial instruments as part of its operations. Those instruments are recognized at fair value in the consolidated statement of financial position.

The Corporation designates certain derivatives held for risk management as hedging instruments in qualifying hedging relationships. On initial designation of the hedge, the Corporation formally documents the relationship between the hedging instrument and the hedged item, including the risk management objective and strategy in undertaking the hedge, together with the method that will be used to assess the effectiveness of the hedging relationship. The Corporation makes an assessment, both at the inception of the hedge relationship as well as on a quarterly basis, as to whether the hedging instrument is expected to be 'highly effective' in offsetting the changes in the fair value or cash flows of the respective hedged item during the period for which the hedge is designated, and whether the actual results of each hedge are within a range of 80-125 percent.

Derivative instruments recognized as fair value hedges hedge exposure to changes in the fair value of an asset or liability recognized in the consolidated statement of financial position, or in the fair value of an identified portion of such asset or liability that is attributable to the specific hedged risk that could affect the net gain or loss recognized in the consolidated financial statements.

When a derivative is designated as the hedging instrument in a hedge of the change in fair value of a recognized asset or liability or a firm commitment that could affect profit or loss, changes in the fair value are recognized immediately in profit or loss. The change in fair value of the hedged item attributable to the hedged risk is recognized in profit or loss. If the hedged item would otherwise be measured at cost or amortized cost, then its carrying amount is adjusted accordingly.

If the hedging derivative expires or is sold, terminated, or exercised, or the hedge no longer meets the criteria for fair value hedge accounting, or the hedge designation is revoked, hedge accounting is discontinued prospectively. Any adjustment up to that point to a hedged item for which the effective interest method is used, is amortized to profit or loss as part of the recalculated effective interest rate of the item over its remaining life.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

(f) Investment securities

The investment securities in the consolidated statement of financial position includes:

- Debt investment securities measured at amortized cost; these are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortized cost using the effective interest method.
- Debt and equity investment securities mandatorily measured at FVTPL or designated as at FVTPL; these are measured at fair value with changes recognized immediately in profit or loss.
- Debt securities measured at FVOCI.
- Equity investment securities designated as at FVOCI.

For debt securities measured at FVOCI, gains and losses are recognized in OCI, except for the following, which are recognized in profit or loss in the same manner as for financial assets measured at amortized cost:

- Interest revenue using the effective interest method.
- ECL and reversals.
- Foreign exchange gains and losses.

When a debt security measured at FVOCI is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss.

The Corporation elects to present in OCI changes in the fair value of certain investments in equity instruments that are not held for trading. The election is made on an instrument-by-instrument basis on initial recognition and is irrevocable.

Gains and losses on such equity instruments are never reclassified to profit or loss and no impairment is recognized in profit or loss. Dividends are recognized in profit or loss unless they clearly represent a recovery of part of the cost of the investment, in which case they are recognized in OCI. Cumulative gains and losses recognized in OCI are transferred to retained earnings on disposal of an investment.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

(g) Assets held for sale

Non-current assets are classified as held-for-sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use. Such assets are generally measured at the lower of their carrying amount and fair value less costs to sell. Impairment losses on initial classification as held-for-sale and subsequent gains and losses on remeasurement are recognized in profit or loss. The Company reviews the carrying amounts of its assets held-for-sale to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. An impairment loss is recognized if the carrying amount of the asset exceeds its recoverable amount.

(h) Furniture, equipment and improvements

Furniture, equipment and improvements are used in the office premises of the Corporation. Those assets are stated at historical cost less accumulated depreciation and amortization. The historical cost includes the expense that is directly attributable to the acquisition of the assets.

Subsequent costs are included in the carrying value of the asset or recognized as a separate asset, as applicable, only when it is likely that the Corporation would obtain the future economic benefits associated with the property and the cost can be reliably measured. Costs considered as repair and maintenance are recognized in profit or loss during the financial period they are incurred on.

Depreciation and amortization expenses of furniture, equipment and improvements are recognized in profit or loss under the straight-line method considering the useful life of the assets. The estimated useful lives are summarized as follows:

Improvements 5 years Furniture and equipment 4-5 years

Furniture and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

The carrying amount of an asset is written down immediately to its recoverable amount if the carrying amount of the asset is greater than its estimated recoverable amount. The recoverable amount is the greater of its value in use and its fair value less costs to sell.

(i) Investment property

Investment property is initially measured at cost and subsequently at fair value with any change therein recognized in profit or loss within other income. In case the investment property is acquired in exchange for a non-monetary asset or assets, the cost of such an investment property is measured at fair value.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized in profit or loss.

When the use of a property changes such that it is reclassified as property and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

(j) Liabilities

Liabilities are carried at cost or amortized cost, except for bonds in qualifying hedging relationships which are measured at amortized cost adjusted for hedging gain or loss.

(k) Provisions

A provision is recognized in the consolidated statement of financial position when the Corporation has acquired a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation.

Provisions made approximate settlement value; however, final amounts may vary. The estimated amount of the provision is adjusted at each reporting date, directly affecting profit or loss.

(I) Income tax

Estimated income tax is the expected tax payable on taxable income for the year, using tax rates enacted at the reporting date, and any other adjustment to taxes payable in respect of previous years.

Deferred income tax represents the amount of income tax payable and/or receivable in future years resulting from temporary differences between the carrying values of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes, measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. These temporary differences are expected to be reversed in future years. If it is determined that the deferred tax would not be realized in future years, the deferred tax will be totally or partially reduced.

(m) Income and expense recognition

(i) Interest income and expense

Effective interest rate

Interest income and expense are recognized in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortized cost of the financial liability.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

When calculating the effective interest rate for financial instruments other than creditimpaired assets, the Corporation estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

Amortized cost and gross carrying amount

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured on initial recognition minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for any expected credit loss allowance.

Calculation of interest income and expense

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the liability.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

(ii) Fee and commission income and expenses

Fee and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate. When a commission is deferred, it is recognized over the term of the loan.

Other fee and commission income is included in other operating income, arises from services provided by the Corporation, including advisory and structuring services, and is recognized as the related services are performed.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

Fee and commission income from contracts with customers is measured based on the consideration specified in a contract with a customer. The Corporation recognizes revenue when it transfers control over a service to a customer.

The following table describes the products, services and nature for which the Corporation generates its income.

Type of service	Nature and timing of satisfaction of performance obligations, including significant payment terms	Revenue recognition under IFRS 15
Advisory and Structuring Services	Advising customers on the structuring of the terms and conditions established in the offer of financing and coordination between the legal advisors of the lending and borrowing counterparties in all legal aspects relating to the offer and acceptance of the credit facility, among others.	recognized at the point in time when the

(n) Net income from other financial instruments at fair value through profit or loss Net income from other financial instruments at fair value through profit or loss relates to non-trading derivatives held for risk management purposes that do not form part of qualifying hedge relationships and financial assets and liabilities designated at fair value through profit or loss and includes all realized and unrealized fair value changes.

(o) Basic earnings per share

The Corporation presents basic earnings per share (EPS) data for its ordinary shares. EPS is calculated by dividing the profit or loss that is attributable to ordinary shareholders of the Corporation by the weighted average number of ordinary shares outstanding during the period.

(p) Segment Information

A business segment is a component of the Corporation, whose operating results are regularly reviewed by management to make decisions about the resources that will be assigned to the segment and thus evaluate its performance, and for which financial information is available for this purpose.

The Corporation's business structure is based on one segment, as its main line of business is granting loans to finance infrastructure projects in Latin America. However, it also offers other services such as "Advisory & Structuring" services, which are not evaluated as a separate segment of the Corporation's business but rather assessed in conjunction with its lending activities.

(q) Employee benefits

(i) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Corporation has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

(ii) Other long-term employee benefits

The Corporation's net obligation in respect of long-term employee (key executive) benefits is the amount of future benefits that executives have earned in return for their service in the current and future period. That benefit is based on the award value generated to determine its present value. Remeasurements are recognized in profit or loss in the period in which they arise.

(r) Leases

At inception of a contract, the Corporation assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Corporation assesses whether:

- The contract involves the use of an identified asset this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified:
- The Corporation has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- The Corporation has the right to direct the use of the asset. The Corporation has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Corporation has the right to direct the use of the asset if either:
- The Corporation has the right to operate the asset; or
- The Corporation designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Corporation allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Corporation has elected to separate non-lease components and not to account for the lease and non-lease components as a single lease component.

The Corporation recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of furniture, equipment and improvements. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Corporation's incremental borrowing rate. The Corporation uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Corporation is reasonably certain to exercise, lease payments in an optional renewal period if the Corporation is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Corporation is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Corporation's estimate of the amount expected to be payable under a residual value guarantee, or if the Corporation changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Corporation presents right-of-use assets that do not meet the definition of investment property in furniture, equipment and improvement and lease liabilities in the consolidated statement of financial position.

Short-term leases and leases of low-value assets

The Corporation has elected not to recognize right-of-use assets and lease liabilities for short-term leases of computer equipment that has a lease term of 12 months or less and leases of low-value assets. The Corporation recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(3) Significant Accounting Policies, continued

For contracts entered into before January 1, 2019, the Corporation determined whether the arrangement was or contained a lease based on the assessment of whether:

- Fulfilment of the arrangement was dependent on the use of a specific asset or assets;
 and
- The arrangement had conveyed a right to use the asset. An arrangement conveyed the right to use the asset if one of the following was met:
 - The purchaser had the ability or right to operate the asset while obtaining or controlling more than an insignificant amount of the output;
 - The purchaser had the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output; or
 - Facts and circumstances indicated that it was remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal to the current market price per unit of output.

(4) Balances and Transactions with Related Parties

For the period ended March 31, 2021, the Corporation entered into transactions with parties that are considered, to be related.

The following items were included in the consolidated statement of financial position and of comprehensive income, and their effects are as follows:

		<u>March</u>	<u>31, 2021</u>	March 3	l <u>, 2021</u>	
		Assets – Loans	Liabilities - Loans	Interest	Interest	
		and Accrued	and Accrued	Income on	Expenses on	
Type of entity	<u>Relationship</u>	Interest Receivable	Interest Payable	Loans Receivable	Loans Payable	
Legal entities	Shareholders	<u>6,860,862</u>	32,264,747	<u>125,329</u>	<u>263,089</u>	
		Decemb	er 31, 2020	March 3	1, 2020	
		<u>Decemb</u> Assets – Loans	er 31, 2020 Liabilities - Loans	March 3 ⁻ Interest	1 <u>, 2020</u> Interest	
		Assets – Loans and Accrued	Liabilities - Loans and Accrued	Interest Income on	Interest Expenses on	
Type of entity	Relationship	Assets – Loans	Liabilities - Loans and Accrued	Interest	Interest	
Type of entity Legal entities	Relationship Shareholders	Assets – Loans and Accrued	Liabilities - Loans and Accrued	Interest Income on	Interest Expenses on	

For the period ended March 31, 2021, the Corporation had access to undisbursed committed and uncommitted lines of credit with related parties of US\$10,000,000 (December 31, 2020: US\$10,000,000), in addition to other credit facilities (see note 10).

Members of the Board of Directors have received compensation of US\$57,000 (March 31, 2020: US\$23,750) for attending meetings during the period.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(5) Employee Benefits

For the period ended March 31, 2021, personnel expenses include salaries and benefits paid to key executive officers for US\$230,133 (March 31, 2020: US\$176,629).

In addition to employee salaries, the Corporation provides all full-time employees with the following benefits:

- (a) All full-time employees are required to participate in the following insurance plans, unless proof of equivalent coverage is provided:
 - Medical insurance
 - Health and life insurance
 - Travel insurance.
- (b) Retirement plan contributions (Simple IRA): The Corporation contributes 3% (December 31, 2020: 3%) of each employee's annual base salary. The Corporation makes its contributions to an independent fund manager and expenses those contributions as incurred. The Corporation has no future commitment to manage the funds contributed.
- (c) In June 2018, the Board of Directors of the Corporation approved the implementation of a long-term incentive plan ("Plan") applicable to key executives ("Participants"). The Plan is focused on rewarding and motivating the Participants for generating sustainable long-termvalue for the Corporation.

Pursuant to the Plan, the Corporation grants the Participant a right to receive stock options convertible into cash, if certain performance metrics are achieved, as amended in 2019, during a seven-year term starting in 2018, that is attributed yearly ("Option"). The Option does not grant the Participant any rights on the Corporation's stock.

The Plan has a vesting period of five years and a subsequent three-year payout period. During the first two years of the payout period, the plan continues granting the right under the Option to the Participants.

The benefits to the Participants are recognized in the consolidated statement of comprehensive income as personnel expense during the year in which they arise.

As of March 31, 2021, based on 2020 and 2019 performance metrics and evaluation of the potential award value under the Plan, the annual pro-rata portion of the Option accumulated for this benefit was US\$252,748 (December 31, 2020: US\$252,748), based on amended terms.

The Corporation's internal policy does not allow loans to be extended to its employees.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management

In the normal course of operations, the Corporation is exposed to different types of financial risks, which are minimized through the application of risk management policies and procedures. Those policies cover credit, liquidity, market, capital adequacy and operating risks.

Risk management framework

The Corporation's Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. For such purposes, the Board reviews and approves the Corporation's policies and has created the Risk Committee, the Audit Committee, the Credit Committee and the Nominating and Corporate Governance / Compensation Committee. All report regularly to the Board of Directors and are comprised of members of the Board and independent members.

The Corporation's risk management policies are established to identify and analyze the risks faced by the Corporation and to set appropriate risk limits and controls. Risk management policies and controls are reviewed regularly to adapt to and reflect changes in market conditions and in the products and services offered. The Corporation applies periodic employee training, management standards, and internal procedures to develop a disciplined and controlled environment in which all employees understand their roles and responsibilities.

The Risk Committee of the Board of Directors oversees management's program to limit or control the material business risks. It ensures the Corporation has in place an appropriate enterprise-wide process to identify, assess, monitor, and control material business risks including, but not limited to, credit risk, interest rate risk, liquidity risk, regulatory risk, counterparty risk, legal risk, operational risk, strategic risk, environmental risk, social risk, and reputational risk. In the case of Credit Risk, the Committee recommends write-offs to the Board of Directors; also the Committee, on a regular basis, reviews the risk management programs and activities and the Corporation's compliance with those programs and activities. In addition, the Committee periodically reviews and monitors all matters related to the corporate culture within the Corporation. It reviews and monitors all the environmental and social responsibility standards and guidelines under which the Corporation and its employees must operate.

The Audit Committee of the Board of Directors oversees the integrity of the Corporation's financial statements, compliance with legal and regulatory requirements, the independent auditors' qualifications and independence, the performance of the Corporation's internal audit functions, and the Corporation's system of disclosure controls and system of internal controls regarding finance, accounting, and legal compliance. The Audit Committee encourages continuous improvement of, and fosters adherence to the Corporation's policies, procedures, and practices at all levels. It also provides an open avenue of communication among the independent auditors, financial and senior management, the internal auditing function, and the Board.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

The Credit Committee, majority comprised of senior management, reviews, approves and oversees the lending program of the Corporation. Its duties and responsibilities are to: review and approve loan transactions (including refinancing, rescheduling, and restructuring transactions) within the limits established by the Board, including but not limited to Corporation's credit and lending policies; review and approve material waivers and amendments to a credit (changes in spread, amortization schedule, tenor and/or guarantees) within the limits established by the Board; and monitor problem loans and assets. Any waiver to limits and policies requires approval from the Risk Committee.

The Nominating and Corporate Governance/Compensation Committee assists the Board in establishing and maintaining qualification standards for evaluating board candidates, in determining the size and composition of the Board of Directors and its committees, in monitoring a process to assess board effectiveness and in developing and implementing the Company's corporate governance guidelines. The Committee also makes employment and compensation decisions related to the Chief Executive Officer (the "CEO") and assists the CEO in carrying out his or her responsibilities relating to executive compensation, incentive compensation, and equity and non-equity based benefit awards.

There are two (2) committees at management level: Asset and Liability Committee (ALCO) and Procurement.

The ALCO must abide by the guidelines established in the risk policies relating to management of Interest Rate, Forex, GAP, and Liquidity Risks and comply with technical criteria pursuant to good banking practices. In addition, it recommends to the Risk Committee updates to the Capital Adequacy, Interest Rate, Forex, GAP, and Liquidity policies. This Committee is composed of three (3) members of Management and is assisted by the Treasurer. As in the Credit Committee, any waiver to limits and policies will require approval from the Risk Committee.

The Procurement Committee, which is composed of three (3) members of Management, is involved in the procurement of goods and services on behalf of the Corporation. The Committee should ensure that purchasing and contracting activities comply with principles of fair competition, non-conflict of interest, cost-effectiveness, and transparency.

Following is a detailed explanation on management of credit, liquidity, market, and operational risks:

(a) Credit risk

Credit risk is the risk that the debtor or issuer of a financial instrument owned by the Corporation fails to meet an obligation fully and on time in accordance with the contractual terms and conditions agreed when the Corporation acquired or originated the financial asset. Credit risk is mainly associated with the loan and investment security (bonds) portfolios; and is represented by the carrying amount of those assets in the consolidated statement of financial position.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

Investment and Loan Portfolios

CIFI will invest its liquid portfolio to give priority to security, liquidity, and profitability, using the following criteria:

- The investment horizon is up to 1 year.
- In instruments:
 - With a minimum issue or program size of US\$200 million (to ensure liquid secondary market), excluding commercial paper programs in Panama (Valores Comerciales Negociables - VCN), which minimum program size is of US\$50 million as approved by the Superintendency of the Securities Market (SMV) of Panama.
 - Of issuers located in countries with a rating of at least BB+/Ba1 from one of the main rating agencies (Moody's, Standard & Poor's, Fitch Ratings, Inc.).
 - Have a national rating of at least A or an international rating of BBB-/Baa3 (long term) or F2/ P-2 (short term).
- Excluding demand deposits, the exposure to any single issuer shall not exceed 10% of CIFI's total equity.
- Not more than 25% of the liquid portfolio may be invested in a country with a rating lower than BBB-.
- All investments shall be denominated in US\$ or in local currency, provided that a financial institution with an international rating of AA- can hedge against the exchange risk (e.g., currency swap).
- 25% of the nominal value of the investment in the liquid portfolio will be included in the overall country loan portfolio exposure.
- For certificates of deposit, minimum issue or program size does not apply.

At March 31, 2021, the concentrations of credit risk by sectors and countries are within the limits established by the Corporation. The maximum exposure to credit risk is represented by the nominal amount of each financial asset.

Balances of loans receivable and investment securities are as follows:

Loans and investment securities	March 31, <u>2021</u>	December 31, <u>2020</u>
Investment securities	5,447,000	4,447,000
Accrued interest	<u>12,213</u>	10,147
Investment securities at amortized cost	<u>5,459,213</u>	<u>4,457,147</u>
Loans receivable	398,632,239	394,346,679
Accrued interest	5,696,136	4,445,417
Allowance for loan losses	(6,374,227)	(6,120,052)
Deferred income	(1,835,983)	(1,852,015)
	396,118,165	390,820,029
Less: re-measurement of hedged item	<u> 194,641</u>	409,966
Loans receivable	<u>396,312,806</u>	391,229,995
Total investments and loans (par value)	409,787,588	403,249,243
Total investments and loans, carrying value	401,772,019	395,687,142

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

The loan portfolio includes the financing of project bonds totaling US\$2,088,676 (December 31, 2020: US\$2,088,676).

The Corporation has a policy in place for granting payment extensions and for restructuring, renegotiating and refinancing loans. Payment extensions apply only when the borrower is experiencing temporary difficulties and will be able to resume payments in the short term in accordance with the original agreement. Restructuring and refinancing are considered as part of the overall credit/risk reevaluation framework, provided that a joint and collective effort is made by all participating lenders and both owners and lenders will equally share the debt burden.

The Corporation has a derecognition policy in place that requires impaired loans and investments to be monitored on an ongoing basis to determine the probability of their recovery, either by executing a guaranty pledged on behalf of the Corporation or through financial restructuring. An impaired loan is derecognized when the Board of Directors determines the loan or investment to be uncollectible or decides that its valuation does not warrant continued recognition as an asset.

The average loan portfolio risk rating is B+ as of March 31, 2021 (December 31, 2020: average loan portfolio risk rating was B+), based on the Corporation's standards, which are not necessarily comparable to international credit rating standards.

The following table sets out information about the credit quality of financial assets measured at amortized cost and FVTPL.

As of March 31, 2021, the Corporation has past due loans for US\$10,406,792 (December 31, 2020: US\$10,406,792).

To secure some of its loans payable, at March 31, 2021 the Corporation has pledged to the lenders rights to cash flows derived from certain loans receivable granted by the Corporation; those cash flows derive from certain loan and investment security portfolios representing 8.90% (December 31, 2020: 9.24%) of the total assets.

The following table shows a reconciliation from the opening to the closing balance of the ECL allowance by class of financial instrument:

Docombor 21

The Corporation classifies loans as past due when no principal or interest payments have been made by thirty-one days after the due date. The Corporation classifies loans as impaired when no principal or interest payment have been made by ninety-one days after the due date.

Loans and investment securities earn interest at rates ranging between 3.22% and 10.50% per annum (December 31, 2020: 3.22% and 10.50%).

Maximum risk by economic unit: The maximum risk limit assumed by the Corporation
with respect to individual borrowers or groups of borrowers having similar economic
interests is 18% of CIFI's net worth of its audited consolidated financial statements.
However, exposure to any single client shall not exceed the following criteria, based on
CIFI's net worth of its audited consolidated financial statements:

<u>Tier</u>	CIFI Credit <u>Rating</u>	Unsecured	Secured
I	BB or better	12.5%	18.0%
II	B+ to BB-	9.0%	15.0%
III	B to B-	5.0%	12.0%

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

A loan will be secured if exposure is fully covered with acceptable guarantees to CIFI. All guarantees shall comply with the following criteria: i) Security valuation was performed based on an external and independent assessment; ii) an analysis must be made relating to the underlying credit quality of any guarantee and its acceptable value for CIFI, including appraisals. For appraisals, if the most recent security valuation occurred within the span of three years it might be accepted. However, the security valuation will be adjusted every year based on the appropriate depreciation; and iii) after the above value estimation, this valuation will be further adjusted.

The concentration of the loan portfolio in individual borrowers or groups of borrowers having similar economic interests based on total equity is as follows:

	% of total equity March 31, <u>2021</u> Number of		% of total equity December 31, 2020 Number of	
	exposures	<u>Amount</u>	Exposures	<u>Amount</u>
0 to 4.99%	23	54,083,222	24	57,494,222
5 to 9.99%	22	166,202,026	23	175,809,523
10 to 14.99%	<u>14</u> <u>59</u>	178,346,990 398,632,239	<u>13</u> <u>60</u>	161,042,934 394,346,679

Country risk: The Corporation uses a series of classifications by country risk and gross
domestic product to place countries in the following risk categories: Prime, Normal, Fair,
and Restricted. Under this system, country size is less relevant for high-risk countries
and more significant for low-risk countries. Each category has a maximum credit limit on
the total value of the corresponding loan portfolio. As of March 31, 2021, the Corporation
complied with country risk exposure limits. However, for Argentina, the Board of
Directors has approved a temporary waiver extension until June 30, 2021.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

An analysis of the concentration of credit risk by country for gross loans and investment securities at the reporting date is as follows:

	March 31, <u>2021</u>	December 31, 2020
Panama	51,766,048	55,141,071

Total	409,982,229	403,659,209

In addition, commissions receivable from corporate services rendered to third parties, amounting to US\$3,109,124 (December 31, 2020: US\$3,189,624), which are presented as receivables from advisory and structuring services, are classified as performing receivables. ECL impairment on receivables recognized in 2021 amounted to US\$73,352 (March 31, 2020 US\$121,567).

The Corporation has developed a Credit Risk Rating System based on the Altman Z-score method adapted to emerging markets, for its project finance loans. The method identifies certain key factors based on a debtor's financial performance that determine the probability of default and combines or weighs them into a quantitative score. That system also includes quantitative information and qualitative factors that affect infrastructure projects and emerging markets. The results consider relevant information such as foreign exchange risk, competition, project analysis, and country risk. For corporate loans, the Corporation has acquired the RiskCalc EDF model for Emerging Markets from Moody's.

(Panama, Republic of Panama)

(6) Financial Risk Management, continued

Actions implemented due to the COVID-19 pandemic

In April 2020, due to the prevailing worldwide macroeconomic conditions, CIFI performed a full analysis of all its customers, including each country and industry in which it maintains exposure. This allowed the Institution to identify customers with higher levels of risk depending on the country, industry, and financial position. The analysis was based on:

- a. Effects by country and sector;
- b. Collateral status, including debt service reserve account;
- c. Reviews of financial statements and covenants compliance;
- d. Identifying weaknesses in the customer's business; and
- e. Frequent customer's updates.

Based on the above analysis, Management presented a detailed report to the Credit and Risk Committees, and for those customers with higher credit risk, the Risk Unit Increased its credit follow-up. However, weekly calls and conferences are being held with all customers.

Since the beginning of the COVID-19 event, any new approval by the Credit Committee cannot be executed without the formal consent from the Treasury, in order to guarantee that CIFI has the resources to comply with this new liquidity requirements.

Finally, a quarterly report is submitted for high-risk cases to the Risk Committee.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

(b) Liquidity risk

Liquidity risk arises in the general funding of the Corporation's activities. It includes both the risk of being unable to settle assets at contractual maturities and the risk of being unable to liquidate an asset at a reasonable price and in an appropriate timeframe.

Management of liquidity risk

The Corporation's approach to managing liquidity is to ensure, as far as possible, that it always has to have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Corporation's reputation.

The Treasurer receives information from management of new business units regarding liquidity needs for the next several days, weeks, and months. The Treasurer then keeps a portfolio of short-term liquid assets, largely made up of cash in banks, liquid investments in secure instruments in accordance with internal policies on liquid portfolio investment limits, and committed and available lines of credit, to ensure that the Corporation can meet expected and unexpected liquidity requirements.

The liquidity position is monitored on a regular basis and liquidity stress testing is conducted under scenarios covering both normal and more severe market conditions. All internal policies and procedures for term matching are subject to review and approval by the Board of Directors. ALCO monitors the Corporation's liquidity position by evaluating the following requirements established in the Corporation's current liquidity policy, which are reported to the Risk Committee and the Board of Directors on a quarterly basis:

- Mismatches in the consolidated statement of financial position asset-liability gap analysis;
- Anticipated funding needs and strategies;
- Liquidity position;
- Mark to market variances; and
- Stress analysis of the Corporation's forecasted cash flows.

When a financial crisis impacts the markets, CIFI activates its liquidity contingency plan, which requires Management to increase liquidity and to extend its liquidity position from 6 months to 1 year its liquidity position; the contingency plan is currently active due to the COVID-19 related crisis.

As of March 31, 2021, the Corporation had US\$54,595,325 (December 31, 2020: US\$53,245,966) in cash and cash equivalents and maintains undisbursed and available balances of committed credit facilities with financial institutions for US\$33,000,000 (December 31, 2020: US\$18,000,000) with tenors at 2021 and 2023 (December 31, 2020: tenors at 2021 and 2022). Additionally, the Corporation maintains undisbursed and available balances of uncommitted short-term revolving credit facilities with financial institutions for US\$14,662,501 (December 31, 2020: US\$13,694,976). (See note 10).

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

According to the Corporation's liquidity policies, the Corporation shall comply with the following two limits: i) Cumulative asset-liability gap from 1 to 180 days > 0, and ii) Probability of negative cash flow balance in six months ≤ 1%. To apply the policy, the asset-liability gap analysis aggregates all contractual cash flows of on- and off-balance sheet assets and liabilities in their corresponding time band. Cash flows attributed to undrawn loan commitments and borrowings are allocated to the time band in which management expects their occurrence.

The Corporation's on-balance sheet financial asset and liability terms are matched as follows:

March 31, 2021	1 to 30 <u>days</u>	31 to 60 <u>days</u>	61 to 90 <u>days</u>	91 to 180 <u>days</u>	181 to 365 <u>days</u>	Over 365 <u>days</u>	<u>Total</u>

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

(c) Market risk

Market risk is the risk that unfavorable movements in market variables, such as interest rates, equity prices, underlying assets, foreign exchange rates, and other financial variables, will affect the Corporation's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and monitor risk exposure and to ensure that such exposure does not exceed acceptable limits, thus jeopardizing returns.

Foreign currency risk

The Corporation incurs foreign currency risk when the value of its assets and liabilities denominated in currencies other than the U.S. dollar is affected by exchange rate variations, which are recognized in profit or loss.

As of March 31, 2021, all of the Corporation's assets and liabilities are denominated in U.S. dollars. Accordingly, no foreign currency risk is anticipated.

Interest rate risk

Interest rate risk is the risk that future cash flows and the value of underlying financial instruments will vary due to changes in market interest rates. Interest rate risk is managed by following an internal policy that limits the duration of equity to +/-1.5%. The ALCO Committee, with the oversight of the Risk Committee, is responsible for monitoring interest rate risk.

Most of the Corporation's interest-earning assets and interest-bearing liabilities are re-priced at least quarterly. As of March 31, 2021, 9% (December 31, 2020:15%) of interest-earning assets and 16% (December 31, 2020: 20%) of interest-bearing liabilities net of swaps are set to re-price after six months.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

The following tables summarize the Corporation's exposure to interest rate risks based on a duration of economic equity analysis.

<u>March 31, 2021</u>	<u>Assets</u>	<u>Liabilities</u>	<u>Net</u>
Present Value	467,367,519	(390,761,688)	76,605,831
Duration (excluding interest rate swaps)	0.35	0.36	
Duration (including interest rate swaps)	0.35	0.36	(0.01)
Floating rate as a % total	90.11%	41.17%	
Fixed rate as a % total Net Portfolio's Sensitivity to 100bp change in	9.89%	58.83%	
interest rate			0.31%
POLICY LIMIT:	_	_	+/- 1.50

<u>December 31, 2020</u>	<u>Assets</u>	<u>Liabilities</u>	<u>Net</u>
Present Value	451,785,517	(383,777,434)	68,008,082
Duration (excluding interest rate swaps)	0.45	0.36	
Duration (including interest rate swaps)	0.45	0.36	0.09
Floating rate as a % total	86.91%	43.81%	
Fixed rate as a % total	13.09%	56.19%	
Net Portfolio's Sensitivity to 100bp change in			
interest rate			0.95%
POLICY LIMIT.			+/- 1.50

A change of 100 basis points in interest rates would have increased or decreased the Corporation's net economic value by US\$236,998 or 0.22%.

The following tables summarize the Corporation's exposure to interest rate risk. Assets and liabilities are classified based on the repricing or maturity date, whichever occurs first.

(6) Financial Risk Management, continued

Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Corporation's processes, personnel, technology, and infrastructure, and from external factors such as those arising from legal and regulatory requirements and generally accepted standards of corporate behavior. Operational risks arise from all of the Corporation's operations and are faced by all business entities.

The Corporation's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Corporation's reputation with overall cost-effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development of internal controls and procedures to address operational risk is assigned to the Corporation's management. The Corporation has the following controls and procedures in place:

- Internal procedures for evaluating, approving, and monitoring loan operations;
- Internal procedures for managing the liquid portfolio;
- Internal procedures for acquiring derivative financial instruments;
- Internal procedures for the minimum insurance requirement;
- Environmental and social policies;
- · Compliance with internal policies and controls;
- Code of conduct for employees and the Board of Directors and its Committees;
- Corporate Compliance Manual to prevent money laundering activities; and
- Acquisition of insurance to mitigate operational risk.

The Risk Committee oversees management's program to limit or control operational risk and ensures that CIFI has in place an appropriate enterprise-wide process to identify, assess and monitor this risk. The Audit Committee monitors compliance with the Corporation's internal policies and procedures on a regular basis, based on reports made by the Internal Auditor.

Actions implemented due to the COVID-19 pandemic

The Corporation has successfully implemented its Business Continuity Plan, implicating among other things, that 100% of its staff is working remotely (telecommuting).

This has increased the frequency of risks associated with cybersecurity, among them:

- Increased e-mail attack attempts; and
- Increased attack attempts due to the widespread use of remote connection protocols.

To counteract these risks, management of the Corporation has reinforced controls as follows:

- Monitoring of main attack vectors was extended to e-mail and end-user devices; and
- The frequency of vulnerability scans has been intensified.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(6) Financial Risk Management, continued

(d) Capital management

The Corporation has adopted the Standardized Approach of Basel II, approved by the Board of Directors on December 13, 2018. The Corporation's capital structure is as follows:

	March 31, <u>2021</u>	December 31, <u>2020</u>
Tier 1 capital	106,785,567	104,869,473
Total capital	106,785,567	104,869,473
Risk weight of 50%	19,578,491	22,039,141
Risk weight of 100%	323,418,380	344,134,641
Risk weight of 150%	136,918,179	105,563,367
Risk weight of 250%	13,274,457	13,274,457
Risk weight of 400%	24,095,048	24,095,046
Subtotal for Credit Risk	517,284,555	509,106,652
Concentration	187,467,765	196,873,706
Operational Risk	78,370,959	78,370,959
Risk - weighted assets	783,123,279	784,351,317
Capital adequacy	<u>13.64%</u>	<u>13.37%</u>
Required capital adequacy (as established by the Board)	<u>12.50%</u>	<u>12.50%</u>

For investment property, a 400% risk weight was used in a Solar Power Company as CIFI owns shares in this company. For the remaining investment property, a 100% risk weight was used.

The Corporation has an intangible asset recorded as other assets for an amount of US\$90,882 which generated an amortization of US\$4,457 during the period ended March 31, 2021 (March 31, 2020: US\$4,457).

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(9) Investment Property

Investment property is summarized as follows:

	March 31, <u>2021</u>	December 31, 2020
Balance at beginning of the period	17,016,964	13,326,832
Changes in fair value	0	2,322,468
Increase in assets received in satisfaction of loans	0	1,367,664
Balance at end of period	17,016,964	17,016,964

In November 2019, CIFI accelerated the loan granted to a solar-power company in Honduras, executing the guarantees of the loan, which included the trusts that owned: all of the shares of the company, all fixed assets (land and equipment) and the license of the operation of the plant.

As of March 31, 2021, the book value of the investment property amounted to US\$5,456,172 (December 31, 2020: US\$5,456,172), and its fair value as of March 31, 202 is US\$6,023,762.

In December 2019, the Corporation granted a new loan with an independent source of payment from the original sponsor. As a result of the restructured transaction, the new outstanding balance is US\$6,956,481. Additionally, a tract of land, was received in lieu of payment as part of the restructuring and was recorded as investment property for US\$7,870,660 which fair value as of Mach 31, 2021 is US\$10,993,202.

The assets received in satisfaction of loans, recognized on each of the aforementioned transactions, were based on qualified independent appraisals less cost of sale, adjusted by the time value of money.

·		167,392,767	161,313,538
Deferred costs		(1,524,464)	(1,403,774)
Total		165,868,303	159,909,764

The effective interest rates on loans with financial entities range between 3.25% and 6.00% per annum (December 31, 2020: between 2.59% and 6.00%).

Following is a detail of the loans payable outstanding, undrawn balance of committed lines of credit and undrawn balance of uncommitted lines of credit as of March 31, 2021 and December 31, 2020:

	March 31, <u>2021</u>	December 31, <u>2020</u>
Loans payable outstanding, gross Undrawn balance of committed lines of credit Undrawn balance of uncommitted lines of credit	165,868,303 _33,000,000 _14,662,501	159,909,764 18,000,000 13,694,976

See note 6(b) for information on outstanding contractual maturities of borrowings. The Corporation has never had any defaults of principal, interest, or other covenant breaches with respect to its loans payable.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(11) Bonds

Through Resolution SMV-691-17 of the Superintendency of the Securities Market of Panama, on December 20, 2017, the public offering of a corporate bonds program in Panama was made, with a nominal value of US\$100,000,000. The corporate bonds were issued in nominative and rotating titles, registered and without coupons, in denominations of US\$1,000 and their multiples. The bonds will pay interest quarterly and may not be redeemed early by the issuer.

The terms and conditions of those bonds issued by the Corporation are detailed below:

			March 31, <u>2021</u>	December 31, <u>2020</u>
Corporate Bonds	Nominal Interest <u>Rate</u>	Maturity <u>Date</u>	Carrying <u>Amount</u>	Carrying <u>Amount</u>
Series A	5.00%	2021	0	10,000,000
Series B	5.50%	2023	5,000,000	5,000,000
Series D	5.00%	2023	2,700,000	3,000,000

(15) Derivatives Held for Risk Management Purposes

Interest rate derivatives

Management uses interest rate swaps to reduce interest rate risk on its assets (loans) and liabilities (bonds). The Corporation reduces its credit risk in respect of those swaps entered into by dealing with financially sound counterparty institutions.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(15) Derivatives Held for Risk Management Purposes, continued

As of March 31, 2021, the Corporation held the following interest rate swaps as hedging instruments in fair value hedges of interest risk.

_		Matu	irity March 31, 20)21

Derivatives and repurchase agreements

In the ordinary course of business, the Corporation enters into derivative financial instrument transactions under industry standards agreements. Depending on the collateral requirements stated in the contracts, the Corporation and counterparties can receive or deliver collateral based on the fair value of the financial instruments transacted between parties. Collateral typically consists of pledged cash deposits and securities. The master netting agreements include clauses that, in the event of default, provide for close-out netting, which allows all positions with the defaulting counterparty to be terminated and net settled with a single payment amount.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(15) Derivatives Held for Risk Management Purposes, continued

The International Swaps and Derivatives Association master agreement ("ISDA") and similar master netting arrangements do not meet the criteria for offsetting in the consolidated statement of financial position. This is because they create for the parties to the agreement a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Corporation or the counterparties or following other predetermined events.

Such arrangements provide for single net settlement of all financial instruments covered by the agreements in the event of default on any one contract. Master netting arrangements do not normally result in an offset of balance—sheet assets and liabilities unless certain conditions for offsetting are met.

Although master netting arrangements may significantly reduce credit risk, it should be noted that:

- Credit risk is eliminated only to the extent that amounts due to the same counterparty will be settled after the assets are realized.
- The extent to which overall credit risk is reduced may change substantially within a short period because the exposure is affected by each transaction subject to the arrangement.

The following tables presents financial assets and liabilities that are offset in the consolidated financial statement or subject to an enforceable master netting arrangement:

Derivative financial instruments - liabilities

Notes to Consolidated Interim Financial Statements

(16) Fair Value of Financial Instruments

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Corporation determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Corporation measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

- Level 1: inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: inputs other than quoted prices included within Level 1 that are observable either
 directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes
 instruments valued using: quoted market prices in active markets for similar instruments;
 quoted prices for identical or similar instruments in markets that are considered less than
 active; or other valuation techniques in which all significant inputs are directly or indirectly
 observable from market data.
- Level 3: inputs that are unobservable. This category includes all instruments for which the
 valuation technique includes inputs not based on observable data and the unobservable
 inputs have a significant effect on the instrument's valuation. This category includes
 instruments that are valued based on quoted prices for similar instruments for which
 significant unobservable adjustments or assumptions are required to reflect differences
 between the instruments.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist, and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premises used in estimating discount rates, bond and equity prices, and foreign currency exchange rates.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Corporation uses widely recognized valuation models for determining the fair value of common and simpler financial instruments, such as interest rate and currency swaps that use only observable market data and require little management judgment and estimation. Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives, and simple over-the-counter derivatives such as interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgment and estimation and also reduces the uncertainty associated with determining fair values.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(16) Fair Value of Financial Instruments, continued

Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

The financial instruments recorded at fair value by hierarchical level are as follows:

	<u>March 31, 2021</u> Carrying		
	amount	Level 2	Level 3
Investment securities Derivative assets Derivative liabilities	5,459,213 2,782,894 195,480	0 2,782,894 195,480	5,459,213 0 0
	<u>Decembe</u> Carrying	er 31, 2020	
	amount	Level 2	Level 3
Investment securities Derivative assets	4,457,147 7,687,044	<u>0</u> 7,687,044	4,457,147 0
Derivative liabilities	<u>410,804</u>	<u>410,804</u>	0

The following table sets outs the fair values of financial instruments not measured at fair value and analyses them by the level in the fair value hierarchy into which each fair value measurement is categorized, except those short-term financial instruments which carrying value approximates fair value:

	<u>March</u> Carrying <u>amount</u>	31, 2021 Fair value <u>Level 3</u>
Loans receivable	396,312,807	407,349,083
Loans payable	165,868,303	173,243,975
Bonds	164,664,081	176,135,827
Commercial paper	40,830,000	41,381,886
	<u>Decembe</u> Carrying <u>amount</u>	er 31, 2020 Fair value <u>Level 3</u>
Loans receivable	391,171,730	361,955,398
Loans payable	159,909,764	166,847,210
Bonds	167,690,061	176,487,763
Commercial paper	39,735,000	40,442,461

During March 31, 2021, there have not been transfers between Levels of the fair value hierarchy (December 31, 2020: no transfers between Levels).

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(16) Fair Value of Financial Instruments, continued

Valuation techniques and data inputs used in measuring financial instruments categorized in Level 2 and Level 3 of the fair value hierarchy are as follows:

(a) Loans receivable

Fair value of loans is determined by grouping loans into classes with similar financial characteristics. The fair value of each class of loans is calculated by discounting cash flows expected until maturity, using a discount market rate that reflects the inherent credit and interest rate risks. Assumptions related to credit, cash flows, and discounted interest rate risks are determined by management based on available market and internal information, such as corporate debt market prices, governmental bonds market values with similar maturity to the loans where no corporate debt information is available, among others.

(b) Loans payable

Fair value of loans payable is calculated by discounting committed cash flows at current market rates for loans with similar maturities.

(c) Bonds and commercial paper

Fair values of bonds and commercial paper are calculated by discounting committed cash flows at current market rates for instruments with similar maturities.

(d) Investment Property

Fair values of investment properties are determined using a model based on observable in the market data, including property appraisal and expected future cash flows at current market interest rates in order to bring the future value to present value.

(Panama, Republic of Panama)

Notes to Consolidated Interim Financial Statements

(16) Fair Value of Financial Instruments, continued

The following table shows the valuation techniques used in measuring the fair value of investment property, as well as the significant unobservable inputs used.

Asset	Valuation technique	Significant unobservable inputs	Inter-relationship between unobservable inputs and fair value measurement
Land	Discounted cash flows: the valuation model considers the present value of net cash flows generated from the sale of property and related selling and maintenance costs. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the country and risk-free premiums, USD local interest rates and taxes.	COVID-19 crisis impacting: - Market value (values between \$19M to \$24M) - Selling date (expected between June 2021 and December 2023) - Risk-adjusted discount rates (between 14% to 16%)	The estimated fair value would increase (decrease) if: - Market value was higher (lower) - Selling date was shorter (longer) - Risk-adjusted discount rates was lower (higher)
Photovoltaic energy plant	Discount cash flows: the valuation model considers the present value of net cash flows generated from the sale of electrical energy to the system less O&M costs and CAPEX. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the country risk premium and CIFI's cost of funding.	- Selling date to a new client (expected between March and December 2021) - Off-taker actions that can impact the plant cash flow stability	The estimated fair value would increase (decrease) if: Selling date was shorter (longer) Off-taker actions impacted positively (negatively) cash flow stability

(17) Commitments and Contingencies

In the normal course of business, the Corporation maintains off-balance sheet commitments and contingencies that involve a certain degree of credit and liquidity risk.

As of March 31, 2021, the Corporation has commitments and contingencies in the amount of US\$33,697,769 (December 31, 2020: US\$39,621,134), corresponding to credits pending disbursement to various entities.

Based on management's best knowledge, the Corporation is not involved in any litigation that is likely to have a significant adverse effect on its business, consolidated financial position or consolidated financial performance.
